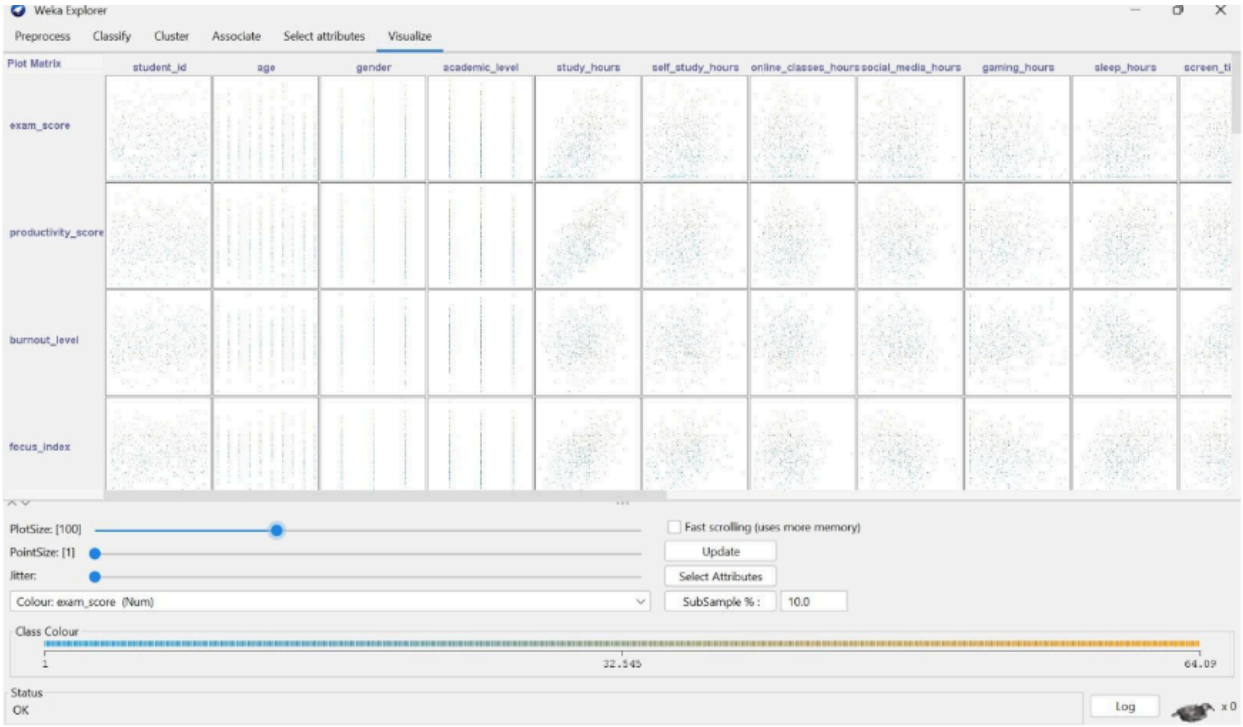
EXPERIMENT 2 LOADING A DATASET AND VISUALIZING THE DATA

AIM:
To load a dataset in weka and visualize the dataset.

PROCEDURE:

1. Open weka
2. Click on Explorer
3. Load the files by selecting data explorer
4. Upload the file (iriff.arff)
5. Select visualize tab
6. Observe the attributes and instances
7. Select : X attribute(Petals length)
8. Select : Y attribute(Petals width)
9. Observe the class color distribution
10. Analyse the scatter plots
11. Try different attributes and analyze
12. Study the histogram distribution of each attribute.

OUTPUT :



RESULT:
Therefore,Dataset was successfully visualized using WEKA tools.
