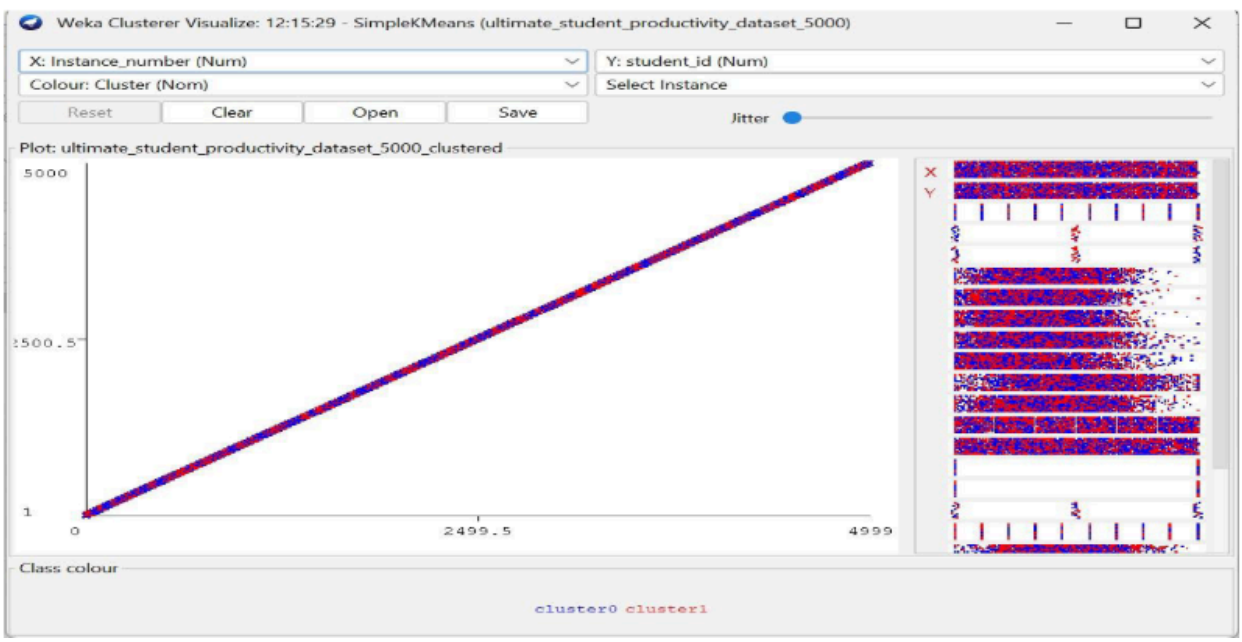
EXPERIMENT 3 BUILDING CLASSIFIERS (DECISION TREE,NAIVE BAYES,NEURAL NETWORK,SVM)

AIM:
To build and evaluate different classification models.

PROCEDURE:

1. Open weka
2. Select explorer
3. Load dataset
4. Choose classify tab
5. Choose algorithms :
    a. J48 (DECISION TREE)
    b. NaiveBayes(NAIVE BAYES)
    c. Multilayer Perceptron (MLP)
    d. SMO(SVM)
6. Click start
7. Compare accuracy results

OUTPUT :



RESULT :
Therefore,Different classifiers were implemented and evaluated successfully.
